Intertidal Marine Life of the Teign Estuary along the Templar Way

by
Mike Puleston
(co-Chair SoSD)

Tuesday 11th April 2023 1930 h

via Zoom. No admission charge, but non-members must email for sign in details by 9th Apr (see www.shoresofsouthdevon.org.uk/contact/) or reserve a spot at [Eventbrite](#)

Mike will describe with his own images the marine fauna that can be seen along the south shore of the stunning Teign Estuary from freshwater/brackish habitats starting at Newton Abbot and finishing with the rich intertidal marine diversity observed at the Teign Estuary Mouth Shaldon.

He writes that "I am fortunate that I live close to the Teign Estuary, and I have been observing, recording and photographing the rich diversity of marine life there for a few years now. Like all estuaries the Teign has it's own unique habitats and atmosphere, and the bird, plant and insect life encountered there, along with the fascinating topography, all add to a fulfilling experience of visiting this important place"
